DOUGH PASTE & MEAT DIVIDER

Still the field leader it divides dough, meat and paste accurately. It handles the material in the lightest possible manner, by drawing the meat, dough or paste from the Hopper by suction and using special weight attachments. A patented hydraulic unit enables the user to adjust the weights of portions from ½oz. up to 3lbs. Operation speed is adjustable from 18 pieces per minute up to 240. It is automatically lubricated by a pump, mobile, easy to maintain, and can be simply and quickly cleaned without removing hopper.
